

DStarix Generative AI Internship Rule Book

Welcome to the **DStarix 3-Month Remote Generative AI Internship Program**.

Congratulations on joining the DStarix team!

This internship is designed to provide you with a professional learning experience while helping you develop practical skills in Generative AI, modern software development, and industry best practices.

Throughout this program, you will have the opportunity to learn, grow, and gain valuable hands-on experience in a collaborative and professional environment.

We encourage you to approach this internship with curiosity, dedication, professionalism, and a commitment to continuous learning.

Internship Duration

Duration: 3 Months

Mode: Remote

Working Days: Monday to Friday

Working Hours: Flexible

As this is a remote internship, you are free to manage your working hours based on your availability. However, all assigned tasks and submissions must be completed within the specified deadlines.

Internship Structure

The internship is divided into two phases to help you gradually build your knowledge and apply it in a professional environment.

Phase 1 – Learning Phase (First 1.5 Months)

The first phase focuses on building a strong foundation in Generative AI and related technologies.

During this phase, you will receive structured learning materials, assignments, and guidance to prepare you for the project phase.

Detailed learning content and instructions will be shared separately.

Phase 2 – Project Phase (Final 1.5 Months)

The second phase focuses on applying your knowledge by contributing to practical projects under mentor guidance.

You will gain real-world experience by working in a professional development environment while following industry-standard software development practices.

Project requirements and development guidelines will be shared before this phase begins.

Learning Resources

Throughout the internship, DStarix will provide learning resources, documentation, assignments, and guidance whenever applicable.

Interns are expected to:

- Complete the assigned learning independently.
- Explore additional resources whenever necessary.
- Continuously improve their technical knowledge.
- Practice concepts beyond the provided materials.

Self-learning is an essential part of this internship.

Communication Guidelines

All official internship communication and internship-related queries or technical clarifications, contact: mentor@dstarix.in

When contacting the mentor:

- Clearly explain your question or issue.
- Include sufficient context whenever possible.
- Review the provided documentation before asking questions.
- Maintain professional and respectful communication.
- Avoid sending duplicate or unrelated emails.

Submission Guidelines

Whenever submissions are required, interns are expected to:

- Submit work before the specified deadline.
- Follow all submission instructions carefully.
- Ensure submitted work is complete and reviewed.
- Include documentation where required.
- Follow repository and version control guidelines.

Late submissions may affect your internship evaluation unless prior approval has been obtained.

GitHub & Version Control

During the internship, interns may be required to use GitHub or other version control platforms.

Interns are expected to:

- Create Separate GitHub Repository for Internship
- Add all your Updates about tasks to that repository.
- Use meaningful commit messages.
- Submit only their assigned work.
- Avoid modifying or deleting unrelated files.
- Follow all repository guidelines shared by mentors.
- More information about this will be given in the task document.
- Follow the repository structure provided in the Task Document.

Use of AI Tools

The use of AI tools such as ChatGPT, Claude, Gemini, GitHub Copilot, and similar platforms is permitted for learning and productivity.

However, interns must:

- Understand any code or content generated by AI before submitting it.
- Avoid blindly copying AI-generated solutions.
- Ensure all submitted work reflects their own understanding.
- Be prepared to explain their implementation when requested.

Professional Conduct

Every intern is expected to maintain professional behavior throughout the internship.

Interns should:

- Maintain respectful and professional communication with mentors and fellow interns.
- Complete assigned work honestly and responsibly.
- Follow all internship guidelines and instructions.
- Take ownership of their learning and responsibilities.
- Inform the mentor in advance if any issue may affect task completion.
- Maintain a positive attitude toward learning, feedback, and improvement.

Professionalism and integrity are essential throughout the internship.

Attendance & Availability

As this is a flexible remote internship, there is no fixed daily login schedule.

However, interns are expected to:

- Remain active throughout the internship.
- Regularly check their email for updates and announcements.
- Respond to mentor communications within a reasonable time.

- Complete assigned work according to deadlines.

Consistent participation is important for successful completion of the internship.

Evaluation

Intern performance will be evaluated based on multiple factors, including:

- Timely completion of assigned tasks.
- Learning progress.
- Quality of submitted work.
- Problem-solving ability.
- Professional communication.
- Consistency and commitment.
- Overall participation throughout the internship.

Internship Completion

Interns who successfully complete the internship by meeting the required expectations and completing the assigned work may be eligible to receive an **Internship Completion Certificate**, subject to DStarix's evaluation criteria.

General Guidelines

Please keep the following in mind throughout your internship:

- Read all provided instructions carefully before starting any task.
- Follow deadlines for every assignment and submission.
- Keep your work organized and properly documented.
- Ask questions whenever clarification is needed.
- Continue learning beyond the provided materials.
- Maintain professionalism in all communications.
- Respect confidentiality regarding internship materials and projects.
- Follow all additional guidelines shared during the internship.

We Wish You Success!

We are excited to have you as part of the DStarix team.

We hope this internship provides valuable learning, practical experience, and opportunities to strengthen your skills in Generative AI and software development.

We wish you a successful and rewarding internship journey.

Welcome to DStarix, and happy learning!
